Dear Mr. Bushey,

Thank you for your time and cooperation during the audit performed at your facility and completed on 12 July 2010. I was impressed with your robust procedural base and the ready familiarity Ms Shores' has of all of your documentation and systems. I really appreciate her detailed support. I also complement you on the knowledge and enthusiasm displayed by all of the employees I interviewed both in the production and MRO areas of the facility.

Although the only products currently listed on our ASL are repair parts, I also completed the audit and approval for Q02A status should we have future opportunities to use it.
